(54) Title: NOVEL USES OF 2-BROMOPALMITATE

(57) Abstract: The present invention provides a method of inhibiting Fyn/Lck fatty acylation and protein palmitoylation in a cell in an individual in need of such treatment comprising the step of administering to said individual a pharmacologically effective dose of 2-bromopalmitate. Also provided is a method of treating an individual having a pathophysiological state comprising the step of administering to said individual a pharmacologically effective dose of 2-bromopalmitate.
